COVID-19 Screening is Required by the NYS Department of Health and NYSED for Students and Staff Returning to School this Fall

New guidance from NYS is requiring EVERY student and staff member answer COVID-19 emergency, non-emergency, and Exposure questions before coming to school each day and before participating in any school activity.

NYSPHSAA and TCM have partnered to provide your school with PII and HIPAA secure automated system to ensure all students (K-12) and staff in your district are screened from home or at school. Staff is notified immediately, and cases are tracked using our continuum of care model until the individual is cleared to integrate back into normal activity.

Ask your school if they are using ezSCRN.
Cost averages about 55¢ per student per year.

District Benefits:
- Collect screening data anytime using validated, best practice protocols.
- Communicate status and track the progress of a COVID case. Receive notifications and reminders immediately.
- Import/Export data for statistical reporting and analysis.
- Log all activity tagged with user, date and time for instant recall if needed.
- Connect users securely in the Cloud - anywhere, anytime for immediate viewing and sharing of data.
- Share results and data with others outside the network.

For More Information: Contact NYSPHSAA at 518.690.0771 or TCM at 315.840.0299
