Whiteface -
Whiteface snowmaking system has 6000 gallon gpm capacity and 34,000 cfm of air. We have over 1000 locations that we can make snow on the mountain and have recently invested in over 200 new snow guns. 98% of our mountain has snowmaking.

Mt. Van Hoevenberg –
ORDA leased a Technoalpine Snowfactory last season and intends to purchase the machine this year. As the only location in North America to have the machine, snowmaking operations are possible in temperatures as high as 60 degrees. Housed in an insulated shipping container, thin ice flakes are created and then delivered to a conveyor belt which sprays snow from the system. The Snowfactory is designed to complement traditional snowmaking methods, however production uses significantly less water than conventional techniques while yielding optimal conditions in minimal time.

Safety Plans

NYSEF - Whiteface Event Safety Plan:
The purpose of this document is to explain the medical safety measures that are in place for ski racing events at Whiteface:
1. The Whiteface Mountain Ski Patrol will provide coverage at the start of all events.
2. Whiteface has on-hill patrol houses and base patrol building.
3. Whiteface has trauma toboggans located at the summit of Little Whiteface above the Thruway Drapers racetrail.
4. Whiteface has Paramedics, Critical Care techs, and EMT's stationed in the Medical Service area (staffing levels vary with event schedules).

In the event of medical needs:
1. There are two patrollers near the start gate of the race. A race hold is put on the start of the race and the race course is clear of racers, patrol at the start of the race will be released to proceed to the injury location.
2. The patrol leaving the start will notify by radio to the patrol house at the top of the gondola who will dispatch a replacement patrol to stand by at the start.
3. Patrol arriving at the scene of the injury after initial evaluation will call via their radio for additional patrol support as needed. This support will be dispatched from the race start and/or the top of the gondola.
4. If during the initial injury evaluation it is decided that hospital transport is needed the patrol at the scene will call via his/her radio to the base first aid and ask them to activate the Wilmington Ambulance. This decision will be made by either patrol or MSA staff only.
5. After the injured athlete has been cleared from the race arena check points will once again clear the race hill and the Technical Delegate and/or jury approval will approve race to be started again.
6. All injuries removed from the race course by patrol will be first transported to the Medical Services Area located at the bottom of the Boreen trail in the main lodge.
7. Copies of accident reports are not available due to federal health regulations.

The Wilmington Ambulance transports patients to the nearest appropriate facility, as determined by the crew, which include: Adirondack Medical Center-Lake Placid or Saranac Lake Champlain Valley Physicians Hospital, Plattsburgh Fletcher Allen Hospital in Burlington

Wilmington Fire and Rescue

The Wilmington Fire and Rescue has 24 hour 7 day a week rescue capabilities. The station is located 4 miles away from the Whiteface Mountain Base Lodge. Response time to Whiteface is about 5 minutes though during holidays and on weekends, they are on standby at Whiteface.

Lifeflight or other helicopter transportation is available to an appropriate facility as determined by the crew and if weather allows.
